

# HYDRUS the Ultrasonic Water Meter that meets any challenge

With the new, extended HYDRUS range, HYDRUS can provide the appropriate ultrasonic water meter for any requirement: from DN 15, 25, 32, 40 right up to DN 50, all nominal diameters deliver maximum precision for dynamic ranges up to 1:400, approved by the MID.

The innovative combination of ultrasonic and integrated communication makes HYDRUS the ideal database for systems engineering and smart metering. In this way, HYDRUS enables trouble-free data readout, efficient water use and long-term economical operation.

**HYDRUS – the smart ultrasonic water meter.**
